WARRANTY	[years]	3		
APPLICATION		channel letters with min. 40 mm and max. 70 mm depth		

MINI SEM

LED modules designed for edge lighting for shallow lightboxes

- dedicated aluminum extrusions for lightbox construction are also available
- easy to illuminate lightboxes, just install the modules on the side walls
- unrestricted chain cutting

MINI SEM

12V IP65 15x45° 4 YEARS 6500K 10 000K

SEMAFOR 3

HIGH POWER EDGE MODULE 3.6W / 24V

24V IP65 10x60° 3 YEARS 6000K

HIGH POWER EDGE MODULE 3W / 12V

12V IP65 10x50° 5 YEARS 6500K

Thanks to their compact dimensions and the fact that MINISEM modules are equipped with a special optical system, they are ideal for relatively shallow illuminated lightboxes, both with a plastic and textile front.

High luminous flux value and appropriately selected asymmetrically arranged diffusing lenses ensure uniform illumination of the entire boxface, despite the fact that the modules are placed only on its side walls.

AMC System offers specialist aluminum profiles and connectors that allow for independent construction of aesthetic light boxes with MINISEM modules.

The photo on the right shows how to place the modules in a light box.

TYPE		MINI SEM	SEMAFOR 3 3W/12V	SEMAFOR 3 3.6W/24V

APPLICATION		light boxes with up to 800 mm height		light boxes with up to 1800 mm height

EDGE LIGHTING

SEMAFOR XL LED modules

Semafor XL LED modules are designed for edge lighting for single and double sided light boxes with up to 2.5m height.

24V IP65 20x40° 4 YEARS 6500K

Semafor XL light bars are equipped with rigid lenses made of special formed plastic. They ensure proper light distribution, even at a quite large distance between the edges of a lighbox.

For easy mounting uniform spaces between light points, the Semafor XL modules are connected with dedicated fast connectors.

No special tools or welding is required for mounting, connecting or servicing of the modules.

MODEL		SEMAFOR XL - possible to cut in half
LED CHIP TYPE		3030

Plastic tape used to produce letters

Flexible and durable edge tape with a metal core, which is an excellent solution for building block letters. We offer elkamet, which is 25 mm wide and comes in two widths of groove for gluing plexiglass (3 mm and 4 mm). Available in 4 m lengths or 50 m rolls.

ALS tape

Additionally, in combination with elkamet (F-kamet), you can use ALS tape. This is a prefabricated aluminum tape for the production of block letters. On the back side of the letter, the tape is equipped with angled protrusions allowing for convenient and precise installation. Available in white.

3D TAPE

Aluminum tape for building three-dimensional forms

Made of 0.5 mm thick aluminum, painted in the RAL system, with a structure of 40% matt and 60% gloss. Allows the construction of letters from 30 cm to 200 cm.

The 3D profile is made of aluminum tape. It is available in widths: 60, 80, 100, 120, 140, 167 and 217 mm. It is used to create spatial structures, including letters with a height of 30 cm to 200 cm.

In the construction of letters, this tape acts as the main load-bearing element, shaping a compact and stable body, which is the finished product - a channel letter.
